

FIT FOR THE FUTURE

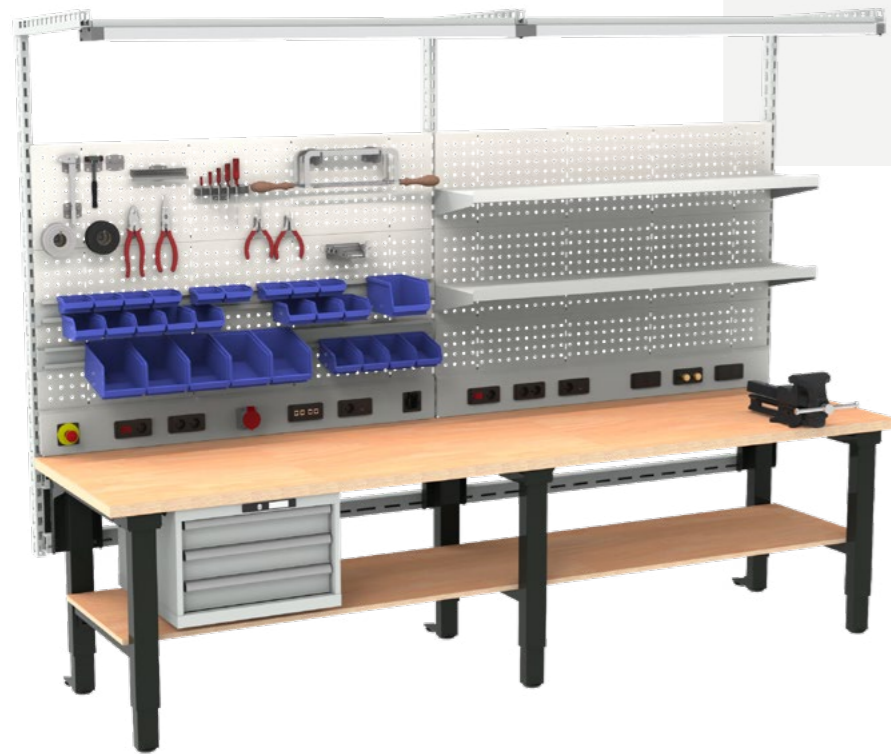

THE LISTA QUATTRO WORKSTATION SYSTEM

ERGONOMIC SETUP. EASY EXTENSION.

With the Quattro workstation system from LISTA, you can create workstations flexibly with the future in mind. The electrically height-adjustable and individually configurable solution ensures the greatest possible ergonomics, enabling efficient work in the workshop, assembly and production. The system grows with your tasks as

required: from a simple workbench to a fully equipped workstation, everything is possible, as the LISTA Quattro can be extended in a variety of ways and can therefore also be adapted to new requirements at any time.

- + Versatile configuration options**
from the basic model to the full equipment
- + Flexible and extensible**
with add-on components
- + Optimum ergonomics**
thanks to electric height adjustment and individual equipment
- + High stability**
thanks to robust design and workmanship

Performance data and dimensions

Thanks to its performance data, the Quattro is flexible and versatile. The system impresses with the following advantages:

- High stability with a load capacity of up to 400kg
- Generous lift of 500 mm (675–1175 mm)
- Above-average lift speed of up to 30 mm/s
- Levelling feet included

The linking of up to 4 legs (8 lifting columns) is possible for team workstations.

In addition to the equipment, the dimensions of the LISTA Quattro are also variable. The system is available in three depths to meet different needs.

| Module depths | Recommended top depths |
|---------------|------------------------|
| 675 | 750 mm |
| 725 | 800 mm |
| 925 | 1000 mm |

Add-on components

With the LISTA Quattro, you remain flexible if requirements change or grow. A wide range of add-on components enables customisation to meet individual needs, now and in the future. That's because your Quattro solution can be quickly and easily supplemented with covers, casters and much more, even later.

Leg panel
available in individual colours and easy to replace if, for example, your colour concept changes

Additional stabilisation
when using storage shelves for additional usable space and when using caster sets

Frame cross member (standard colour: black)
• Enables the use of thin tops or scales, for example
• Standard widths 1500 or 2000 mm
• Other dimensions on request

Caster set
with casters that can be lowered for optimum mobility, e.g. in production

Rail adapter for universal superstructure
as a basis for expansion to a fully equipped workstation system

Side cover
Optical privacy screen with the integrated design

Access protection
Personal protection when worktables are next to each other

Support foot
Additional stabilisation, especially when installing the universal superstructure

ESD model
The LISTA Quattro is also available in an ESD version for ergonomic and safe working with electronically sensitive components.

We're here to help you

The LISTA Quattro is the optimal solution for ergonomic, efficient and extensible workstations in workshops, assembly and production. We would be happy to advise you and plan the optimum solution for your individual needs – including installation, assembly and maintenance by one of the world's leading manufacturers of storage and workspace equipment. Welcome to the No.1.
